 Yes No Has the patient ever experienced chronic ringing in the ears? _____
 Yes No Does the patient need extra help with instructions? _____
 Yes No Is the patient sensitive or self-conscious about his/her teeth? _____
 Yes No Height of parents? Mom _____ Dad _____

BENEFITS

Benefits of Orthodontics: Aesthetics, Health, and Function. Orthodontics is a service that provides an improvement in the appearance of the teeth, in the general function of the teeth, and in general dental health. Teeth, gums, and jaws are an intricate body part and can fail to respond to treatment. If good oral hygiene is not practiced, tooth decay and enlarged gums can result. Joint discomfort and root shortening are observed in a small percentage of cases. Teeth change throughout our lifetime and there can be some movement of teeth and some change after treatment. I have read and understand this paragraph. I have truthfully answered all the above questions and agree to inform this office of any changes in my child's medical or dental history. In addition, I authorize Drs. Cox and Berndt to perform a complete orthodontic evaluation on my child.
